SEANG SENGLEAPH

BACKEND DEVELOPER

PERSONAL PROFILE

Based on my experience as a first generation CSTAD student and a third-year student of the College of Science and Technology (COST) of the University of Cambodia. I gained a lot of experience and deepened my skills in Web App skills in the meantime, I also learned about Flutter, the cross-platform applications by using a UI/UX design and uses the Flutter framework to create mobile applications that are responsive, scalable, and visually appealing.
